

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

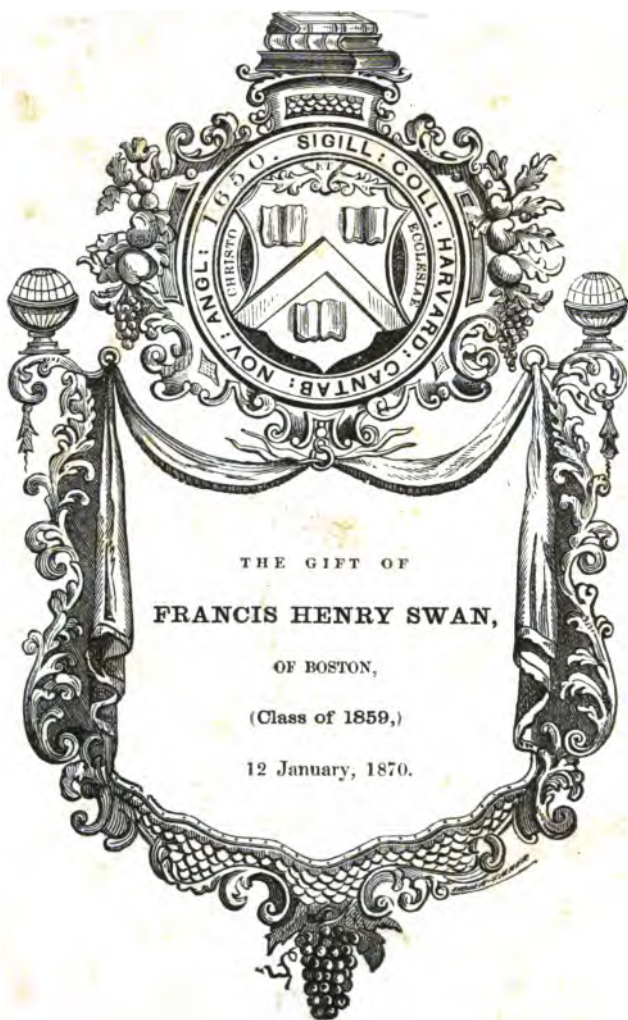

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LONDON :

BRADBURY AND EVANS, PRINTERS, WHITEFRIARS.

PREFACE.

THE great objects of a Spelling Book are to teach,—

I. The nature and powers of letters;—their combinations;—the formation of syllables and of words;—and the orthography of the language according to the usage of the best writers.

II. The orthoëpy of the language according to standard usage, where it is spoken in the greatest purity.

III. A vocabulary of the language, sufficiently ample in its range for all the common purposes of life, and initiatory also to the acquisition of a thorough knowledge of its elements and beauties.

In addition to these primary objects of the book, it should be studiously adapted to form in the youthful mind an elevated standard of literary taste, by a happy selection of reading lessons, maxims, and gems in literature.

But, last and most important of all, its object should be, to imbue the youthful mind, in the earliest stages of its development, with the influences of moral and Christian truth. No other book but the Bible can be made so extensively instrumental in laying the foundations of Christian morality and true piety. Whatever information on other subjects it may incidentally impart, should be made subservient to these great purposes, and all it contains should have a direct bearing on the future progress of education, and the formation of those intellectual and moral principles and habits which must be formed with unwearied care, in the heart of every child who is trained up in the way he should go.

In the preparation of Spelling Books, very little system, and much less of truly philo-

sophical principles have hitherto been exhibited. They generally contain miscellaneous collections of long and short words, arranged in columns, and interspersed with reading lessons and pictures, according to the taste of the author. Different kinds of books may, however, be clearly distinguished.

1. The first are those, where there is obviously no attempt to classify or arrange words according to any system. The number of letters or syllables in a word, and the position of the accent, are the only guides to classification.

2. The next class take one step in advance. They note the *vowel sounds* and group the words accordingly.

3. The third class introduce a more minute and particular notation of the sounds of consonants and vowels, in respect to character and quantity.

It is evident that the classification of words in a vocabulary of the English Language, such as a SPELLING BOOK should

contain, may be made on various principles. The only question is, which method will be most serviceable to the mind, in the course of education and in future life.

There are, it is said, in Walker's Dictionary, about 38,000 words, in Todd's Johnson, 58,000, and in Webster's Quarto, 70,000. If we omit obsolete words, and the thousands of the technical and scientific, which the progress of art and science has introduced during the last fifty years, and of which four thousand are found in Webster's work, there will remain some TEN THOUSAND WORDS that form the staple of the language of common life—such as appear in the ordinary Histories, Biographies, and works of general literature of our day. These, in their various derivative and composite forms, make up the bulk of our language, and ought to be included in the Spelling Book.

In the preparation of this volume, a NEW ANALYSIS of the language has been made. The separate and distinct elements of the Teutonic stock, of the Latin, and the Greek, have been taken by themselves, and classed

in such a manner as that the pupil insensibly acquires a knowledge of the composite character of the present Anglo-Saxon tongue. The different parts of speech are also grouped together, so that while the foundation of correct orthography and orthoëpy is laid in the mind, there is also acquired, with no additional effort, a knowledge of the first principles of grammar, of the original elements of the language, and of its peculiar structure, power, and beauty.

It has been observed, that if we look back to the early history of the present Anglo-Saxon language, we see it approaching Great Britain and coming down to us in two great but unequal streams; one from the shores of the Baltic, passing along the countries of middle Europe; the other, leaving Greece, winding along the shores of the Mediterranean, and finally reaching us through France.

And there is no possible way for the scholar really to appreciate the character and capacities of a language of such different and varied sources, without the aid of some such

analysis, that forcibly presents the truth as to its origin and progress. The present work, it is confidently believed, will be received as one of the auxiliaries, which are now everywhere welcomed, in promoting the study of our own noble tongue.

LONDON,

September 3rd, 1846.

swal low	lim it	hus band	mis take
wal low	pock et	rum mage	mis trust
blos som	har bour	i ron	
bot tom	neigh bour	mil dew	

LESSON 57.

Bad books are worse than no books.
 Be just and fear not.
 Care not for what you can not have.
 Do what you ought; come what may.
 Beggars must not be choosers.
 Better to live well than to live long.
 Better to be untaught than ill taught.
 Better to slip with the foot than the tongue.
 Better to be alone than in bad company.
 Birds of a feather flock together.
 Contentment is better than riches.
 Diligence is the parent of success.
 Deserve success if you would have it.
 Favor is deceitful and beauty passeth away.
 Goodness always enriches its possessor.
 A pennysaved is as good as a penny earned.
 A soft answer turneth away wrath.
 A guilty conscience needs no accuser.

ADJECTIVES.

LESSON 58.

Hale	main	mean	nice	short	foul
same	twain	neat	nigh	soft	loud
tame	straight	neap	rife	strong	sour
bare	gaunt	sear	wide	wrong	south
